

## 21082-42L04 Cooling Fan Clutch For Nissan Patrol Y61 Y60 21082 42L04

Our Product Introduction

For more products please visit us on [automobile-sparespart.com](http://automobile-sparespart.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 21082-42L04
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Payment Terms: D/P, L/C, T/T

### Product Specification

- Product Name: Cooling Fan Clutch
- Warranty: 12 Months
- Size: Standard
- Highlight: 21082-42L04 Cooling Fan Clutch , Nissan Patrol Y61 Cooling Fan Clutch

## Product Description

### Product Description:

A cooling fan clutch is a crucial component in automotive engines that helps to regulate the engine's cooling fan. This mechanical device is responsible for controlling the speed and operation of the fan, depending on the engine's cooling requirements. The cooling fan clutch is typically positioned between the engine and the radiator, with a direct connection to the fan blades. It comprises of a temperature-sensitive bi-metallic coil spring, a thermal sensor, and a viscous fluid coupling.

### Features:

#### Temperature Control:

Our fan clutch utilizes a precision-engineered thermal sensor that accurately measures the engine coolant temperature. This allows the clutch to engage and disengage at the appropriate times, ensuring efficient cooling without unnecessary power consumption.

#### Enhanced Cooling Efficiency:

With a robust design and advanced technology, our fan clutch maximizes the airflow through the radiator. This increased airflow helps dissipate heat more effectively, preventing engine overheating and maintaining optimal operating temperatures.

#### Durable Construction:

We use high-quality materials and precision manufacturing techniques to ensure the longevity and durability of our fan clutch. It is built to withstand the demands of daily driving, extreme temperatures, and harsh conditions, providing reliable performance over an extended period.

#### Smooth and Quiet Operation:

Our fan clutch is engineered to deliver smooth and quiet operation, minimizing vibrations and noise. This enhances your driving experience and ensures a comfortable ride.

#### Engineered for Performance:

Our fan clutch is designed to optimize the performance of your vehicle's cooling system. It helps increase the efficiency of the radiator, allowing your engine to operate at its best and preventing potential damage caused by overheating.

### FAQ:

#### **1. Who are we?**

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

#### **2. How can we guarantee quality?**

Always a pre-production sample before mass production;

Always final inspection before shipment.

#### **3. Why should you buy from us from other suppliers?**

We have experience in spare parts for more than 10+years
