

57724-2B000 Car Steering Systems Tie Rod End For HYUNDAI SANTA FE 57724 2B000

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 57724-2B000
- Minimum Order Quantity: 100 SETS
- Price: \$2.57~3.57
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3~ 45 days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

Product Specification

- Car Make: For Hyundai Kia
- Warranty: 12 Months
- Product Name: Tie Rod End
- Quality: 100% Tested
- Weight: 0.5kg
- Packing: Poly Bag With Carton, After Pallet

Product Description

Product Description:

An important part of a car's steering mechanism is the tie rod end. Usually found on the outer edge of the tie rod, it is what connects the steering knuckle or spindle to the steering linkage. When it comes to steering control and stability, the tie rod end plays a critical role, which helps to ensure smooth and precise steering movements.

Without the tie rod end, your car's steering system wouldn't be able to perform efficiently. When you turn the wheel, the tie rod ends extend or retract to adjust the vehicle's steering angle. As a result, it assists in transferring the steering wheel's direction to the vehicle's wheels, resulting in a smooth and safe driving experience.

In short, the tie rod end is a crucial component within a car's steering system. It ensures that the wheels turn appropriately and aids in maintaining the car's stability on the road. As a responsible car owner, it's essential to keep an eye out for any wear and tear signs in the tie rod end and immediately get it replaced if necessary to ensure a well-functioning steering system.

Features:

Superior Construction: Our tie rod end is made from high-quality materials including forged or cast steel to withstand the daily demands of driving. This construction ensures resistance to wear, impact, and corrosion, resulting in long-lasting durability.

Precise Steering Control: The tie rod end connects the steering linkage to the steering knuckle and translates the driver's input into smooth and precise movements. Our tie rod end is designed with accurate specifications and a tight ball joint or bushing mechanism, ensuring optimal steering control and responsiveness.

Ball Joint or Bushing Design: Depending on the vehicle's specifications, our tie rod end is available in either a ball joint or bushing design. Ball joint tie rod ends offer articulation and rotational movement, creating flexibility. Alternatively, bushing-style tie rod ends offer flexibility and vibration dampening.

Easy Installation: Our tie rod end is designed for hassle-free installation with all necessary hardware and instructions included. This makes it convenient for both professional mechanics and DIY enthusiasts.

Technical Parameters:

Packing	Poly Bag With Carton, After Pallet
Warranty	12 Months
Car Make	For Hyundai Kia
Weight	0.5kg
Quality	100% Tested
Product Name	Tie Rod End
Application	Steering Component Connectors, Steering Rod Connectors, Steering Rod Connectors

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
